Social Origin, Education, and Socioeconomic Inequality: The Case of Japan and Hong Kong

Prof. Satoshi Araki

Assistant Professor
University of Hong Kong
Department of Sociology

Prof. Araki will use data from the latest nationally representative General Social Surveys in Japan and Hong Kong to examine the following:
(1)the extent to which family background is associated with children's labor market outcomes.
(2)whether education mediates the association between social origin and destination.
(3)how returns to education vary by social origin.
(4)the extent to which origin-based destination inequality can be reduced by providing disadvantaged groups with educational opportunities comparable to those of their advantaged counterparts.
Implications for stratification research, educational studies, and policy will also be discussed.

- **Date & Time: 26 November 2026 (Thu.), 13:00–15:00 (JST)**
- **Languages: English/Japanese**
- **Online Participation: Available via Zoom**

Advance registration required.
